PROFILE

Senior Data Engineer with **5+ years of experience** designing and delivering scalable, production-grade data platforms across **multi-cloud environments**. Experienced in cloud migration, data platform modernisation, architecture, performance optimisation and data governance, translating complex business requirements into reliable, high-quality data solutions. **Generative AI certified**, with a strong blend of hands-on engineering, technical leadership and end-to-end delivery ownership.

TECHNICAL SKILLS

Data Engineering: Apache Spark, PySpark, Python, SQL, Delta Lake, ETL/ELT, Data Modelling, Medallion Architecture, Hadoop, Hive
Engineering Practices: Git, CI/CD, Apache Airflow, Automated Testing, Unit Testing, Production Monitoring, Performance Optimisation
Databricks & Cloud: Databricks, Databricks Workflows, Unity Catalog, Azure, GCP, Azure Data Factory, ADLS, Azure Blob Storage, Google Cloud Storage
Governance & Quality: Data Quality, Data Validation, Data Lineage, Access Governance, Root-Cause Analysis
Generative AI: LLM Fundamentals, RAG, Prompt Engineering, LLM Evaluation
Leadership: Technical Leadership, Mentoring, Stakeholder Management, Delivery Ownership

CERTIFICATES

Databricks Certified Generative AI Engineer Associate

Databricks Certified Data Engineer Associate

PROFESSIONAL EXPERIENCE

Associate Manager, *Tredence Analytics Inc.*
08/2024 – Present | India

- **Migrated 120+ production DAGs and workflows from Azure to GCP** across Databricks, PySpark and GCS, while modernising **90+ pipelines from Hive Metastore to Unity Catalog**, achieving **95%+ validation parity across migrated workloads** and standardising governed data access across the platform.
- **Built migration automation frameworks** including a Unity Catalog accelerator generating updated DDLs for **100–200+ tables per batch**, and an Airflow-based dependency analyser that reduced analysis time from **~30 minutes to <5 minutes per table (~85% faster)**.
- **Re-engineered Silver and Gold layers within a Medallion architecture**, replacing legacy dependencies across **20+ production datasets** through complex SQL transformations and multi-table joins while preserving downstream business logic and improving cross-cloud reconciliation.
- **Built an automated Azure–GCP validation framework across 90+ migrated pipelines**, implementing schema, statistical, hash and business-rule checks alongside LLM-assisted test generation; optimised Databricks workloads through Spark tuning and cluster rightsizing to improve processing efficiency and DBU utilisation.
- **Led a team of 7+ data engineers** across migration delivery, technical design, code reviews and production RCA, coordinating execution across **120+ workflow migrations** while remaining hands-on with Spark, SQL and Databricks engineering.

Analyst, Big Data Engineer, *DBS Bank*
11/2021 – 07/2024 | Hyderabad, India

- **Delivered an enterprise Risk & Audit data platform integrating 7+ source systems**, engineering Spark, PySpark and SQL pipelines processing **50+ GB of enterprise data** and supporting reporting and analytics for **10+ business stakeholders**.
- **Migrated a business-critical Audit Reporting platform from Hadoop to an internal cloud environment**, redesigning Spark/PySpark pipelines and automating recurring processing and validation to reduce **end-to-end processing time from ~13 hours to ~4 hours (~69% faster)**.
- **Investigated data-quality discrepancies across ~1 million records**, performing root-cause analysis and implementing validation improvements to strengthen downstream reporting and production reliability.

EDUCATION

SRM Institute of Science & Technology, *B.Tech, Computer Science Engineering*
2021 | Chennai, India

ACHIEVEMENTS

Data Engineering Excellence Awards
4x Consecutive Quarterly
