

TECHNICAL SKILLS

- **Cloud & Platform:** Azure Databricks, Azure Data Factory (ADF), Azure Blob Storage, AWS S3, AWS Athena, AWS Glue, Google Cloud Storage (GCS), GCP Databricks
- **Orchestration & Workflow:** Apache Airflow, Azure ADF Pipelines
- **Data Governance & Cataloging:** Unity Catalog, Delta Lake
- **Analytics & Reporting:** Tableau, Apache Superset
- **Programming & Query:** SQL, Python, PySpark
- **Big Data Technologies:** Apache Spark, Hadoop, Hive

KEY STRENGTHS

- Technical leadership & team mentoring (7+ engineers)
- Cross-cloud migration strategy (Azure, AWS, GCP)
- Data governance & cost optimisation
- Stakeholder communication & delivery ownership
- Production-scale problem solving

EDUCATION

Bachelor of Technology,

Computer Science Engineering

SRM Institute of Science & Technology, Chennai
June 2021

ACHIEVEMENTS

- 4x consecutive quarterly Data Engineering Excellence awards
- Employee of the Month

PERSONAL PROFILE

Visa status: Requires UK visa sponsorship

Open to relocating anywhere in the UK

UDHHAV ARORA

Big Data Engineer

PROFESSIONAL PROFILE

Big Data Engineer with **4+ years** of experience designing and scaling cloud data platforms across **Azure, AWS and GCP**. Proven track record leading large-scale pipeline migrations, Unity Catalog governance rollouts and cross-cloud transformations for enterprise clients in banking and consulting. Led the upgrade of **120+ pipelines** and directed a live production **Azure-to-GCP migration**, achieving a **20–40% reduction** in cloud compute costs. Skilled in Apache Spark, PySpark and Databricks, with a strong record of mentoring engineering teams and driving delivery at scale.

WORK EXPERIENCE

Consultant, Big Data Engineer Aug 2022 – Present

Tredence Analytics Inc., Gurgaon, India

- Led the upgrade of **120+ Azure Data Factory pipelines** and Databricks DBR versions, and directed a full metastore migration to **Unity Catalog** — enabling centralised governance, fine-grained access control and improved data discoverability across petabyte-scale datasets.
- Architected and delivered a live production **Azure-to-GCP migration** as both technical lead and individual contributor, using Google Cloud Storage and Databricks to ensure zero-disruption data continuity at scale.
- Built automated frameworks for pipeline migration and data sanity checks, cutting validation turnaround **from hours to minutes** and removing days of manual effort per release cycle.
- Achieved a **20–40% reduction** in compute costs (DBU and cloud spend) through systematic workload rightsizing, cluster optimisation and resource governance across environments.
- Mentored and managed a team of **7+ engineers**, overseeing end-to-end delivery of data engineering initiatives across cloud platforms.

Analyst, Big Data Engineer Nov 2021 – July 2024

DBS Bank, Hyderabad, India

- Delivered a data warehouse handling **~50GB** of data for Risk & Audit reporting products used by **10+ stakeholders**, aggregating data from **7+ sources**.
- Developed analytical solutions using SQL and PySpark, contributing to a **15% improvement** in data-driven decision-making.
- Migrated an Audit Reporting Solution from Hadoop to an in-house cloud platform, achieving **50% faster** data retrieval and **21% higher** processing efficiency.
- Led root cause analysis across **~1M records**, strengthening data integrity and enabling precise strategic analysis.

Business Intelligence Consultant July 2020 – Oct 2021

BlewMinds Consulting LLP & Co., Gurugram, India

- Used Tableau and Business Objects to help marketing and sales teams identify high-value leads, improving campaign effectiveness.
- Identified critical data anomalies that uncovered product loopholes, informing improved business strategy.
